Flat Caps

All Flat Caps are 3/4" thick

Bevel

Sized to hang over the top edges of either 4x4 or 6x6 nominal posts by 1/4"

Actual size: 4"x4" FC4B 6"x6" FC6B

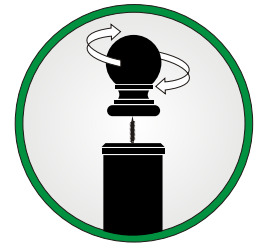

Ogee

Actual size: 4"x4" FC4O 6"x6" FC6O

Mounting Finials

All finials come with a 3" x 3/16" double ended lag screw

Duracaps™ are created out of a need for a long lasting, decorative post top finial with a smooth consistent surface.

Duracaps™ are factory double coated with a high quality high build primer. This primer will accept most paints including, lacquers and automotive finishes.

Duracaps™ are made from 15lbs density Sign•Foam®. They possess all of the same exciting qualities that Sign•Foam® has to offer in their sign substrates.

Sign makers will find it easy to achieve very smooth, glossy finishes with only one or two coats of enamel.

Gilders will love applying gold leaf to Duracaps™ finials. It is suggested that at least one coat of enamel be applied before gilding.
